About the Carer Equipment Service.

Carers Support West Sussex (CSWS) understands each caring situation is individual and carers can face different stresses and strains, making every caring role unique. Our Carer Equipment Service aims to enhance the independence and wellbeing of registered carers, while keeping everyone involved safe and well.

How can this equipment help me as a carer?

Are you caring for someone with memory issues? Is it a struggle to keep them hydrated? Do you have issues with ensuring medication is taken correctly? If so, the Droplet Intelligent Hydration System and mini pill dispenser may help you to overcome these challenges whilst enabling a degree of independence.

During the night do you worry that the person you care for may fall in the dark on the way to a comfort break? A plug in night light or a movement activated night light will provide enough illumination to enable safe night time walking and aid you to feel confident enough to sleep easier.

Visit our website to see the range of equipment available.

“The Watch & Care monitor helps me get on with tasks in other rooms and I’m getting more sleep too!”

“The One Cup Hot Water Dispenser is brilliant. I have used it consistently and in a variety of ways since I received it. It has literally made my life so much easier!”

What equipment might help?

The level of dependency in each caring role varies, so CSWS make an initial assessment to discover the most appropriate equipment and create an individual Support Plan. The team can also provide a bespoke service to research creative equipment solutions to meet individual requirements.
