## TRANSPORT MANAGEMENT COMPANY OF THE YEAR

### LDP Transport Consultancy Ltd

Based in Yorkshire, LDP Transport Consultancy Ltd is a transport compliance and driver training organisation helping firms across the country remain compliant and improve their businesses long-term. Established in 2020, the consultancy is largely aimed toward HGV and van operators nationwide and is dedicated to ensuring their businesses remain legal and safe. The family-run company was developed by experienced industry expert Lee Pritchard, who is supported by his daughter Paige, and has forged a strong reputation for its friendly, approachable, and client-focused services. Compliance is of vital importance in the transport industry as regulations can be complex and ever-evolving, so LDP Transport Consultancy implements systems and delivers Certificate of Professional Competence (CPC) training that ensures business leaders have more control over their company's day-to-day activities.

Haulage operators get the benefit of Lee's extensive industry experience, and part of his innovative consultancy service is offering specialist insights and solutions that are tailored to their unique requirements. Emerging technologies are another key focus and one where LDP Transport Consultancy aims to streamline its client's operations and ultimately improve their customer experience. tracking, and data analytics are amongst the advanced systems that can improve operational efficiency, whilst Lee and his team have recently developed their own digital platform for HGV and van operators. Hauliers Hub is a digital members-only portal designed to keep drivers safe and compliant – offering valuable documentation, support, and a 24-hour helpdesk.

The judging panel was impressed by the depth of the company's consultancy services, which are backed by years of relevant experience. LDP Transport Consultancy covers every aspect of the industry, including compliance, technology, risks, and performance – assessing these key areas in a number of ways. Lee and his team can identify any potential risks or vulnerabilities to a transport firm's operations and help business leaders monitor performance by developing key performance indicators and measurement frameworks. Not only does this keep drivers and their employers fully compliant with transport regulations, but it also streamlines their businesses to drive maximum performance and growth.
