65 years

Of transforming outdoor spaces

At Bradstone, the journey to transforming any outdoor space is exciting. For 65 years we've had the pleasure of bringing lots of garden and driveway ideas to life. And we've always been there every step of the way. From design to sourcing sustainable materials and expert installation. Bradstone has always been the one place to go to transform any outdoor space.

British-made concrete

It's good to know that our concrete landscaping products are manufactured right here in the UK*.

Look out for the flag to mark our beautifully British-made concrete paving from quarries and factories nationwide.

Always ethically sourced

We've been prestigiously awarded for responsibly sourcing our materials. Meaning you can have absolute confidence you're choosing sustainably and ethically when you buy our products.

You can find out more at www.bradstone.com/about-us/ethical-trading-policy

Assured Landscaper

Paving laid by Bradstone Assured Landscapers

Transform your outdoor space in five steps

We know transforming an outdoor space can be hard, that's why we've split the process into five easy steps. From finding the right style to sourcing the perfect landscaper, we'll help make your dream garden a reality.

Step One Get some outdoor inspiration

Leaf through our beautiful transformations in this brochure to help you start to envision your perfect garden.

Step Three Choose your paving style

From concrete to porcelain, simple to detailed, we have a range of beautiful paving to suit any outdoor project. Can't decide on which paving to get? Take our paving quiz to narrow down the choices of what paving is right for you.

Step Four Pave my space

Now you can visualise your outdoor space with any Bradstone paving. With Pave my Space you simply pick between Bradstone products and use the tool to see them come to life in your garden. Once you have chosen your perfect paving, order a sample to get a real feel for your favourite choices.

Visit [bradstone.com](https://www.bradstone.com) for more information.

Step Two Find your Assured Landscaper

Choose one of our Assured landscapers to help design and build your garden - all carefully assessed to guarantee the highest standards.

Step Five Get the right help

Whether it's technical support, laying tips, or product advice, our team is on-hand to help whenever you need us.

Visit [bradstone.com](https://www.bradstone.com) for more information, call **01335 372289** or email bradstone.garden@aggregate.com

The Perfect Space to Entertain

It's no surprise that gardens and outdoor areas, of all kinds, have become true extensions of our homes over the past couple of years. This shows how investing in these areas can really pay off.

Your garden can be the ultimate place to be, filled with friends and family enjoying it together. Or it can simply be a space to enjoy a cup of coffee, or as an outdoor workspace.

With Bradstone, you can create an outdoor space with the potential to do it all. From space to entertain, relax or work it's like adding an extra room to your home.

Bring home comforts outside

Make your garden the ultimate place to be

Find your perfect spot to escape and relax

Pop blankets out for when it gets a bit chilly

Layer up your table with tapas bowls, colourful place settings and vases of fresh flowers

Treat yourself to an outdoor pizza oven for ideal alfresco dining

Get the look with Bradstone

Bradstone Assured Landscapers get to know your space and will help you with everything from drawing up a design, to recommending the right products, and installing everything to the highest standard.

It's always good to have an idea of how you want to use your space from the beginning and for this garden we knew we wanted to create different zones for entertaining, relaxing and working.

We used Fiero paving in Bronze and Prestige walling slips in Cognac to create this perfect space for entertaining. See pages 27 and 141 for more details.

How we created the relaxed work zone

- 1 We created a designated working area in this garden to create space to concentrate away from the home.
- 2 A great way to separate the kitchen zone from the working zone, is to use a different coloured paving, we went with Serameno in Flint Buff.
- 3 By incorporating comfy outdoor seating we create a more relaxed working area (perfect for putting your feet up during your break too)

We used Serameno paving in Flint Buff to create this relaxed work zone. See page 25 for more details.

How we created this kitchen zone

- *By incorporating a pergola this space is perfect for entertaining guests comfortably all year round.*
- *The kitchen area is defined with Prestige walling slips. This also created the perfect space for creating the bar area with a sink and of course the fabulous pizza oven!*
- *Having an outdoor fridge is super convenient and saves trips back and forth into the house.*
- *Of course, a big table is a must to fit all guests around comfortably.*
- *Lower maintenance paving is perfect. The Fiero Porcelain paving in bronze used here is versatile in style and easy to maintain. Perfect for the afterparty clean up.*

The Accessible Garden

Great garden design is all about flow. And when it comes to designing a space that everyone can enjoy it means putting accessibility front of mind.

By designing a space that is everything from wheelchair-friendly to child safe and reduced mobility focused, how you move around the garden and the activities you want to do in it are considered.

Slopes for easy access

Smooth level changes for pushchairs or wheelchairs to travel over easily.

Entertainment zones everyone can enjoy

Whether it's a seating area, summer house or a hot tub, create zones that are accessible to everyone.

Easier weeding and watering

Lay mulch or bark chips in flower beds to lessen the need to weed or water

Planters at the perfect height

Raise your planters to just the right height to reach from a standing or sitting position. This is perfect for children and those who want to avoid kneeling.

Edging around paths and borders

Consider Mode Profiled edging to create a barrier between surfaces, preventing soil, stones or bark from encroaching onto the path.

Meet Jonathan

Paralympic gold medalist and new garden enthusiast.

Jonathan Coggan called upon Bradstone Assured Landscaper, Paul Reynolds from Strong Base Driveways & Landscaping to find the perfect paving for his garden and to incorporate wheelchair-friendly and more accessible elements into the design.

"I wanted a garden that I could easily move around and make the most of different areas. As well as space to relax and entertain, I wanted a reliable path to the summer house to eat and drink in the evenings as well as easy access to the hot tub, and raised planters to grow my own food."

Jonathan wanted the overall paving design to have a contemporary feel. As well as being wheelchair-friendly, it also needed to be safe and accessible for his family and nieces and nephews to enjoy too.

About his Bradstone experience Jonathan said:

"I'm spoilt for choice to pick a favourite part of the finished garden! I love seeing the garden from different angles, following the path of the sunshine and relaxing in different areas. And Paul and the team were great, we all worked together really well!"

We wanted to thank Jonathan for the use of his garden. He suggested that we donate the money from this project to the charity that saved his life, Essex and Herts Air Ambulance.

An expert's view of how to design an accessible garden

The perfect surface texture

"The surface texture of Bradstone Porcelain Tephra is perfect to give some grip to the tyres on a wheelchair and underfoot, yet smooth enough to move over easily. A deeper riven finish on the surface of the slabs can make it harder work to turn wheels by hand, particularly if going uphill."

There are a number of important elements to consider when creating an accessible space. Everything from the surface texture to the angle of sloped areas and the jointing between pavers need to be considered.

Bradstone Assured Landscaper Paul talks us through each of these considerations.

Laying with accessibility in mind

"Applying narrower joints in between paving ensures a smoother journey over the paving in a wheelchair. Also, by keeping all gravel drainage out of the main path it avoids the wheels needing to cross this type of surface."

"Ramped areas are also essential for creating a consistent path to travel the whole garden. Gentle up and down slopes should be paved by the entrance to the garden from the home and for access to entertainment zones such as a summer house."

Accessibility within every detail

"When building raised planters, consider the height for both a sitting and standing position. Something like a hot tub can also be lowered into the ground, making it easier to enter and exit for everyone."

"As a team, we built a life-changing garden that will give immense joy and pleasure to a deserving owner. Seeing Jonathan move out of the house and then travel easily around his garden, as well as comfortably reaching plants and vegetables in the bespoke raised beds was brilliant."

Paul Reynolds
Strong Base Driveways & Landscaping
Bradstone Assured Landscaper

We used Tephra paving in Light and Dark Grey to complement the exterior of Jonathans' house. See page 55 for more details.

The ultimate Sustainable space

See your garden or outdoor space from a greener perspective. Your garden has the power to inspire a greener lifestyle that rewards you and the environment.

We're talking about growing your own deliciously fresh fruit and vegetables, as well as finding sustainable ways of reusing and repurposing everything from rainwater to reclaimed wood and composting food waste.

Get creative!

Use materials from around the house or source reclaimed wood to build your own planters.

Grow your garden your way

Paving the way

Beautiful stone paving can complement your garden design. The perfect paving can take you on a journey through your garden.

Discover a new hobby

Gardening can be a great way to relax and escape from your day to day life.

Grow your own

Turn your hand to growing fresh fruit and vegetables. Go big with carrots and potatoes or small with a little herb patch. There's nothing like freshly picked to plate!

Meet Diana

Passionate garden blogger and proud grow-your-own enthusiast.

We were delighted to get to know the beautiful garden Diana has created, how her journey began and to pick up some hints and tips to grow your own sustainable garden.

"I grew up with my family growing their own vegetables. So I've been into gardening for as long as I can remember. When I grew older and started living on my own I started my own gardening journey. Also, with work increasingly taking up a lot of my time I wanted to commit to a hobby that would take my mind off it. Gardening just ticked all the boxes!"

Make the most of any space.

"You don't need a lot of space to grow something green. There's a lot you can grow on a windowsill! Microgreens such as mint, basil, oregano, rosemary grow all year round and go from seed to plate within a week. Alternatively, you can grow pretty much anything in pots too!"

How Bradstone ECO fits perfectly into a sustainable garden

In a sustainable garden, everything has a purpose, from benefitting our environment to creating a beautiful space. We're proud to provide our ECO range which is a big step forwards in providing products that are 35% lower in carbon.

"The paving in my garden is the Old Town ECO Evolve paving, which is absolutely beautiful."

By investing in our ECO paving range, you're choosing to design your garden from a sustainable foundation. Old Town ECO Evolve offers a beautiful Silver-Grey colour and authentic reclaimed stone look, which looks right at home amongst lush planting and colourful flowers.

We used Old Town ECO Evolve paving in Silver Grey to create Diana's sustainable garden look. See page 63 for more details.

Diana's must-haves in a sustainable garden

Rainwater collection

"I have 4 water butts to collect water. I have two connected to the greenhouse and two connected to the house. It saves money, ensures there's enough to go around for the whole community, and it protects the environment."

Perennial plants

"Perennial plants will grow back year after year. Start with a rhubarb plant, asparagus, perennial kale and cauliflower"

Bee-Friendly areas

"Incorporate wildflowers to attract insects and pollinators."

Diana's 3 top tips for sustainable garden beginners

- 1 *Grow what you will want to eat*
"Your heart won't be in growing something you don't like the taste of. Tomatoes and squash are good, versatile foods to start with."
- 2 *Reuse, recycle and upcycle*
"Your garden can be very rewarding for a relatively low cost. For example, all my raised beds are made from upcycled wood, that was collected locally."
- 3 *Start small, don't try to grow everything at once!*
"You want your garden to be rewarding and relaxing, not overwhelming. If you want to grow something quickly, then go with greens, such as lettuce or herbs!"

Make your vision a reality

With **BRADSTONE** **Assured**TM

If transforming your outdoor space is an investment you've been thinking about for a while, when it comes to making it happen, you want it done right.

Our network of professional landscapers are ready to make it happen.

Assessed and accredited

We apply a strict selection criteria to ensure only the best most capable landscaping professionals are recruited.

Let us do all the hard work

All of our landscapers have been assessed on previous jobs, subjected to reference checks and scrutinised to ensure they have valid professional indemnity and insurance policies. We work with professional bodies such as Alan Sargent, the APL and the Landscape Library to ensure our landscapers are kept up to date on the latest trends and advice.

Finding your perfect landscaper

You can easily access all our landscapers' profiles online by location, telling you a bit about them and what they specialise in. So, you can pick whoever's right for the job, then simply ask them for a quote.

Simply scan the QR code with your smart phone or enter your post code at **bradstone.com**. If you want some help finding a landscaper, call us on **01335 372331**.

Quality assured, we guarantee it.

10 year guarantee on products*

5 year guarantee on installation**

Our priority is making sure that you enjoy your garden for years to come. If you choose to transform your space with an Assured Landscaper you will get the added bonus of the Bradstone Assured free guarantee.

Once your new outdoor space is completed to your satisfaction simply fill out the guarantee registration provided by your landscaper† post or email a copy to us and we'll send you your guarantee certificate.

*With the exception of Peak.

**Applies to the installation of Bradstone products only for a reasonable domestic use.

† It is the home owners responsibility to ensure the guarantee card is provided. Card must be returned within 28 days of completion. More terms and conditions can be found online.

THINK PORCELAIN COULD
BE RIGHT FOR YOU?

Find your perfect paving with

Find your perfect paving with our product selector tool

ecoTM logical

Same style and quality. Now lower carbon.

Go greener with Bradstone's new lower carbon paving, ECO. The same beautiful paving you expect from us, but now we have reduced our carbon footprint by more than 20%. So a typical 30m² patio offers a carbon saving equivalent to that generated by three mature trees* over a year.

We also have Old Town Silver Grey ECO EVOLVE. An even more sustainable choice with 35% less carbon, that's easier to handle, transport and lay too.

A greener future.

We believe in building a more sustainable world for people and the environment. On our way to becoming a Net Zero company, we constantly try to innovate and accelerate our carbon reduction by introducing environmentally friendlier products.

We are constantly looking to improve and add to our ECO range of products. Keep an eye out for Lyas ECO Evolve which we will be launching in 2022.

To find out more head to [bradstone.com](https://www.bradstone.com)

ecoTM ecoevolveTM

*Per 30m² patio according to European Environment Agency

Old Town ECO Evolve paving in Silver Grey

More than 35% CO₂ reduction compared to the previous Old Town mix.

Concrete Paving

OLD TOWN® NEW RANGE ecolve™

An even more sustainable choice.

Old Town ECO Evolve has more than a 35% carbon reduction compared to traditional Old Town paving. The product is lighter and easier to handle, all the while maintaining the same standards of quality and strength. With a different laying pattern to Old Town ECO it is now faster to lay as well. Look out for our new, on-trend Silver Grey shade for a more contemporary look.

The product is available in a 7.2m² patio kit containing four sizes, 900x600mm, 600x600mm, 600x300mm and 300x300mm.

For technical details go to page 164.

OLD TOWN® eco™

Lower carbon footprint, same premium quality.

The new Old Town ECO now has an improved mix, lowering its carbon footprint by more than 20% compared to the previous Old Town product – but with the same great quality as before. Made using moulds of the floor of a 19th century Lancashire Cotton Mill, its finish looks just like authentic reclaimed stone. So you can relive the charm of days gone by, original tooling marks, weathered edges and all. There are over 25 different profiles in the range to give a truly authentic appearance to your patio. Making it perfect for creating a garden with a traditional look, while reducing your carbon footprint too.

All three shades are available in a 6.4m² patio kit featuring six different sizes and 900x600mm, 600x600mm, 600x300mm and 300x300mm single sized pavers. We also offer two sized circles, walling, coping and edging in Grey-Green and Weathered Limestone.

For technical details go to page 165.

CARPET STONES

Liven up your outdoor space – give it a carpet!

Carpet Stones are easy to lay to achieve an intricate rustic design in your garden. The cobbles are pre-laid on an underlying flexible mat, which can be simply cut with a pair of scissors to fit any awkward areas or to create elaborate designs. For a realistic cobble effect, just cut and interlock the mats. Carpet Stones can also be used on your driveway and are available in Charcoal or Rustic Red. Available in 1200x400mm.

For technical details go to page 164.

Woburn Rumbled Infilta block paving in Graphite, installed by Bradstone Assured landscaper Cotswold Paving and Landscaping - www.cotswoldpaving.co.uk

WOBURN RUMBLED INFILTA

When it pours, this stylish paving reigns.

Woburn Rumbled Infilta not only offers the distinctive period charm and character of Woburn Rumbled block paving. To be used with a permeable sub-base, it provides a surface that filters surface water away, stopping it from collecting on the driveway. This is particularly important in light of stringent legislation regarding front driveways*. It's available in three shades, all of which perfectly complement the cobble style.

For technical details go to page 175. To complete the Infilta system see our range of Block Paving Fixing Products on page 130.

DRIVEWAY INFILTA

The driveway that drains as it rains.

Driveway Infilta is both stylish and practical. It's laid as part of a permeable solution, any water that lands on it simply drains away between the blocks, stopping surface water from collecting. It is specially designed to show an authentic block driveway. Importantly, this satisfies all the stringent legislation regarding front driveways. Go to bradstone.com for more information

For technical details go to page 177.

To complete the Infilta system see our range of Block Paving Fixing Products on page 130.

KERBS

The perfect finishing touch for block paving.

Kerbs are a great way to complete the look of your driveway, patio or path. Effortlessly combining style and practicality, while perfectly complementing any block paving and preventing vehicular overrun.

Available in large, medium and small sizes, the range comes in a variety of shades to complement or contrast your driveway.

Kerb accessories are available in Brindle and Charcoal in large and small sizes. Rumbled kerbs are also available in large size to complement our Woburn Rumbled paving in 3 shades.

FLAG PAVING FIXING PRODUCTS

PREMJJOINT

Premjoint is an easy-to-use, brush-in jointing compound with enhanced workability, suitable for use with most types of paving.

It's available in two attractive colours – Storm Grey and Natural Cashmere, designed to complement any patio shade.

It comes in a 15kg waterproof tub, handily formulated so that any left over compound can be stored and reused within its shelf life.

Natural Cashmere (NC)

Storm Grey (StG)

*COVERAGE

Typically 8.5m². Example: a 15.3m² patio pack with 10-15mm joints that are 22mm deep will require two tubs. Each tub contains two foil bags with a coverage of 4.25m² per bag.

BRADBOND® SLURRY PRIMER

Bradbond is a cementitious slurry primer that can be used on any paving product to help strengthen the bond between the paving and the sub-base onto which the patio is being laid. Bradbond should be applied to the whole underside of all Porcelain, Smooth Natural Sandstone, Natural Slate, Riverwashed Limestone and Granite paving prior to laying to improve adhesion to the mortar bed. Bradbond is so easy to use. You simply add water (refer to tub instructions) to the already blended mixture that comes in the tub and apply it with a brush to the back of each slab before you lay them. One 17kg tub will cover a nominal 12.75m² of paving, when applied with a thickness of 3mm.

BRADBOND® WALLING ADHESIVE

Bradbond walling adhesive is a flexible cladding adhesive for external floor and wall applications. It's specially formulated to make it easy to work with when fixing brick slips and natural stone to a range of substrates including sand/cement render, brick or block work. Simply mix 4.42 litres of clean water with each 17kg tub and apply 1m² at a time to a thickness of 3-20mm before leaving for 16 hours to set.

*COVERAGE

Typical coverage per tub is 4.25m² at a depth of 3mm

PROGROUT FLEXIBLE

ProGrout Flexible is an exterior tile grout with increased flexibility, providing a stronger, virtually impermeable set for your patio.

It's suitable for joints from 1-20mm and a depth of up to 20mm. Each tub contains 9kg.

High performance open graded aggregates specifically designed to provide controlled water management within Sustainable Drainage Systems (SuDS).

Superflow Drainage Agg

A 4-20mm crushed angular aggregate designed for permeable block paving.

Superflow Bedding Aggregate

A 2-6mm crushed angular aggregate designed for permeable block paving.

Superflow Joint Agg

A 3mm high performance washed aggregate which is designed for jointing Bradstone Infilta block paving to allow permeability.

IMPORTANT: Before using any of the Bradbond or Bradpoint products please read and follow the instructions on the packaging. Usage information can also be found at bradstone.com

IMPORTANT: Drainage Aggregate (base), Bedding Aggregate (top layer) and Jointing Aggregate are for the permeable block paving (Infilta) only. For more information visit bradstone.com

FOR MORE INFORMATION
ABOUT PEDESTALS

BRADSTONE PEDESTALS

A system of adjustable paving supports that can be adapted to suit your space.

Ideal for roof balconies, terraces and in the right situation even patios, Bradstone Pedestals can be laid in all types of weather conditions. Made of 80% recycled material, our Bradstone Pedestals work especially well with our Porcelain range*

We offer two ranges of pedestals; our premium range has a built-in slope corrector to level any falls back to zero and help simplify the installation process. This range comes in a variety of heights from 17mm all the way up to an extraordinary 1070mm. We also have a standard range that is particularly suitable for areas where you wish to maintain a fall or are already level. This range is available for required heights from 15mm-955mm. Both use spacer tabs inserted on the head of the pedestal to maintain a consistent gap between the pavers and allow surface water to pass through to the substrate below to be drained away, and rubber shims in 1 & 2mm for levelling and to ensure a solid finish underfoot. These also deaden sound especially key if you are installing onto a roof area. For more information go to bradstone.com.

WALLING

Add a sense of shape, structure and style.

Walling is not only an attractive addition to any garden, it can also help to shape and structure your garden design; connecting different elements and creating eye-catching features such as raised beds, planters, screens, ponds or even barbecues. Available in a wide range of shapes, styles, colours, textures and sizes you're sure to find the perfect fit for your needs.

Natural Sandstone walling slip in Silver Grey and Tordillo paving in White, installed by Bradstone Assured landscaper Harris Hard Landscaping

EASY STACK™ eco WALLING

This contemporary style hollow walling unit is extremely versatile. For a dry laid effect the unit can be filled with concrete to create a stable base for a feature wall. This walling can also be laid as a planter, simply infill with soil up to a maximum height of 600mm to create a stunning border for your planters.

NATURAL STONE WALLING SLIPS

This range of walling slips comes in Natural Slate and Natural Sandstone with a set of complementary shades. For a superb natural stone look, they just stick to a block wall using Bradbond walling adhesive. The slips are Z-shaped giving the appearance a random look. There are also end pieces available to finish off straight walls. Natural Stone or Porcelain is ideal as complementary coping for these walls.

Stonewood® stepping stone Antique Brown (AB)

NATURAL SANDSTONE STEPPING STONE

In a rugged Fossil Buff colourway, this stepping stone complements our natural stone paving ranges.

Natural Sandstone stepping stone Fossil Buff (FB)

NATURAL LIMESTONE STEPPING STONE

Designed to work with our natural stone paving, this stepping stone is available in striking Blue-Black.

Natural Limestone stepping stone Blue-Black (BB)

ROUND STEPPING STONE

With a riven surface, these Brown Blend or Cream Blend stones complement Ashbourne or other traditional paving ranges.

Round stepping stone Brown Blend (BrB)

Round stepping stone Cream Blend (CrB)

You can keep your patio or driveway in beautiful condition for years

'White Bloom' on garden or driveway paving

Occasionally, after a few weeks or months, white patches may appear on the surface of paving stones. This is known as efflorescence or white bloom. Efflorescence is a natural phenomenon and can occur with all cement-based products, as well as other paving products. It may appear randomly and will possibly appear more pronounced on coloured paving. The white bloom may give the impression that the colour of the paving is fading but, when wet, you will find that the efflorescence vanishes and the paving returns to its original shade. The white bloom will often return once the paving dries. Rest assured that the efflorescence has no detrimental effect on the performance of the paving and will generally disappear with time.

Factors such as climate conditions, location and aspect (damp/shady or open/sunny) are variables that can affect the extent of the phenomenon.

Periodic Cleaning

A sweep with a stiff broom and hot soapy water is usually enough to prevent build up of dirt.

The occasional use of a patio or driveway wash will further enhance appearance, but please use sparingly as it may adversely affect the long-term durability of your paving. Check with your local stockist or Assured Landscaper for advice on suitable products. Every three months, check for loose or damaged pavers and ensure all jointing material is intact. Thoroughly clean any stains such as alcohol, barbecue fat or bird droppings. Always test a small area first before cleaning your whole patio or driveway.

Please note: Jointing materials may potentially stain/change colour when directly exposed to acid based cleaners. We recommend testing on a small discreet area first. Limestone, Slate and Granites are especially sensitive to cleaners and therefore we do not recommend acid based product for such pavers.

Natural Stone

Natural Stone may contain minor imperfections and foreign materials as part of its inherent make-up; for instance iron oxides and other naturally occurring pigments. These do not affect the performance of the paving but may mean that some discolouration occurs naturally.

Sealants

Sealants can be used on your patio or driveway. However, please check the sealant manufacturer's instructions to ensure it is suitable for sealing paving. Breathable sealants are recommended.

Please note: Applying sealant to paving may affect the colour. Sealants are not required to ensure durability of the product. Sealants can be applied for various reasons – i.e. ease of cleaning, colour enhancement and matt/gloss appearance. It is not necessary to seal porcelain.

- It is important to use the correct sealant for the product material – concrete, natural sandstone, block paving, granite etc.
- Sealants should not as a rule be applied until after the paving has been laid for about two months with the exception of Smooth Natural Sandstone.
- Smooth Natural Sandstone needs to be handled very carefully when installing to minimise staining. We would advise that the product be sealed prior to laying. However, if this is not possible, it should be covered up as it is installed and sealed as soon as it is laid.
- It's vital to use a good quality sealant and apply as per the manufacturer's instructions. Remember, once applied it can't be removed.

Weeding

A newly laid patio or driveway can stand for many years before weeds force their way to the surface through small cracks or crevices. There are a number of ways you can restore the appearance of your patio:

Removal of weeds

Pull weeds up from the root. Grab or pinch the base of the weed to remove as much as possible. For wider gaps between brick patio joints, dig the weed up using your hands or a small shovel.

Jointing

For block paving products, we recommend the use of kiln dried sand. And where a mortar joint is required, we recommend 3 parts building sand to 1 part cement. The sand fills voids and reduces the moisture weeds need to grow.

SERAMENO®

ADDITIONAL LANDSCAPING MATERIALS

As part of the Aggregate Industries group, we can also offer ready-mixed concrete and asphalt surfacing materials for your garden or driveway project.

If you're looking for concrete for a shed base, a garden path or for the foundations of your garden walls then our concrete service can deliver direct to your door. Simply visit aggregate.com and we can help guide you to the right concrete mix and help you calculate how much concrete you will need.

If you're thinking of asking your landscaper to install an asphalt driveway or pathway then our **Express Asphalt** service offers them collection locations across the country. All our plants offer service guarantees that mean your landscaper will receive the most reliable service the industry has to offer.

For more information or advice on our concrete services, please call **0345 939 0014**. For asphalt enquiries please call **08450 757 799** or simply visit www.aggregate.com

ADDITIONAL INFORMATION

Product Images

The designs shown in the brochure are for illustrative purposes only. Every effort is made to ensure the accuracy of all content in this guide, however due to varying light conditions it is not always possible to show the true colours of products in a photograph. Before ordering please always view a sample of current stock. You can do this in several ways: By ordering a **FREE** sample from bradstone.com or by calling **01335 372289** or by visiting a display at your local stockist (to find your nearest stockist visit bradstone.com)

Cost

Your local stockist will be able to advise on product pricing. However, to give you an indication of price we include a £ icon on each product showing its value. The more £s a product has, the more premium it is considered to be. Please be aware that paving is just one element of the total cost and is rarely the largest outlay. It's usually about 20% of the cost of the whole project.

Sizes and joint widths

Size dimensions quoted within this brochure are nominal and for guidance only. Actual sizes will vary, particularly where riven profiles and fettled edges are a feature of the product. Always dry lay the product to check area required (especially circles and patio kits). See joint widths recommended for products in the technical information. All m² coverage is approximate and may vary. All our products are manufactured to industry standard tolerances.

General information

Bradstone products and materials, unless otherwise stated, are for domestic landscaping and driveway projects.

Decorative flag paving and some edgings are not recommended for use on driveways. All products must be checked on arrival and in the unlikely event of products reaching you in a less than satisfactory condition, please refer to your stockist immediately, allowing time for the rejected product to be replaced.

When you receive your product you may notice minor scuffing on the surface. This can occur due to movement in transit and will generally disappear in time. De-icing salts should not be used on any of the Bradstone product range. Bradstone does not recommend the use of jet/ power washers as this may affect the surface of the product over time.

All products can develop algae and organic growths under certain environmental conditions and may require cleaning. Areas adjacent to borders, plant pots and trees may discolour from transfer of plant life; specialist maintenance advice may need to be sought.

For advice on cleaning and general maintenance of your patio please refer to our website.

Aggregate Industries cannot accept responsibility for any of the above conditions. Should you require further advice in this area call our customer care team on **01335 372289**.

Health and safety

Due to the nature of our products we always recommend suitable lifting equipment be used for larger products such as 1200 x 600mm and 900 x 900mm pavers. We recommend the use of lifting equipment such as a vacuum lift.

- Always wear gloves and safety footwear when handling the product.
- Always wear safety goggles, safety footwear, gloves, ear protection and appropriate respiratory protection when using cutting equipment.
- Ensure the products are on level ground and retained in some way before removing any packaging.
- Always handle with care as breakage and chipping may result from mishandling.

Order Choice

The Bradstone Order Choice service means that at an additional cost you can order certain products from any Bradstone stockist, even if they do not actually stock that particular product. Simply ask your stockist.

Please note: We do not split patio feature kits.

Bradstone Assured terms and conditions

Bradstone Assured landscapers are subject to regular quality checks and assessments and are required to abide by the Bradstone Assured terms and conditions of membership at all times. Bradstone offers a 10 year guarantee on all Bradstone products installed by Bradstone Assured landscapers with the exception of Peak and a 5 year guarantee on the installation of Bradstone products by a Bradstone Assured landscaper for a reasonable domestic use.

All guarantees are subject to a completed card being returned to the Bradstone offices and a certificate having been issued. Terms and conditions apply please see our website for more details.

Each Bradstone Assured landscaper is directly responsible for the management of the relationship with their customers and any enquiries. Please note that the resulting legal contract is between you and the Bradstone Assured landscaper and is subject to the terms and conditions of that member. They will advise you of these conditions themselves.

You should carefully review their terms and conditions applying to the purchase of your products and/or services. Claims or suggestions should be addressed directly to the Bradstone Assured landscaper providing the relevant products or services.

Please note: Pointing materials are not covered in the Bradstone Assured Guarantee.

KEY PRODUCT INFORMATION

Block paving

Colour variations can occur within packs, therefore:

Ensure your sample and blocks are from the same factory. Block paving should be ordered from the same batch number to avoid colour variation. Do not mix blocks from different factories. Bradstone cannot accept responsibility once blocks are laid from different batches. The responsibility of ensuring this is correct lies with the landscaper. Best results are achieved through mixing from 3 to 5 different packs and from vertical columns rather than horizontal rows.

We recommend a neoprene faced or rubber sole plate on vibrating plate compactors to reduce scuffing (specifically on our Stonemaster, Braddrive Cobblestone ECO and Woburn Original ranges). Light colours are susceptible to staining and care should be given when selecting blocks for driveways.

Natural stone colour and maintenance

All natural stone products (Sandstone, Limestone, Slate and Granite) will have colour and texture variation to a greater or lesser extent within single pieces and from piece to piece.

We recommend a reasonable amount of product is viewed at your local stockist before ordering. Natural stone products may contain minor imperfections. These will depend on the characteristics of the product i.e. fossils, ferns, veining and quartz. Natural stone may develop added marking, deposits or patches as mineral content oxidises.

Product should be mixed from a number of packs prior to installation. Natural stone should always be laid on a full wet mortar bed.

A slurry primer (such as Bradbond) is recommended to be applied to the underside of all Natural Stone paving but is essential for Smooth Natural Sandstone, Natural Slate, Riverwashed Limestone and Granite paving prior to laying to improve adhesion.

Sandstone

Sandstone needs to be handled very carefully when installing to minimise staining and we would advise that Smooth Natural Sandstone be sealed prior to laying using a breathable sealer. However, if this is not possible, it should be covered up as it is installed and sealed as soon as it is laid.

The Silver Grey colour in all of our Natural stone products will vary with differing geological conditions. Such variations can lead to small particles of ironstone within the product creating a darkening of the surface with natural weathering. Being pale in colouration, this natural weathering is more obvious with Silver Grey compared to other natural products in the Bradstone range.

Slate

Slate has many natural characteristics. Therefore, care should be taken when laying to aid/enhance the overall finished aesthetic appearance. In most cases this paving has more than one usable face, we strongly recommend the following checks be made:

- Select the best finished top surface to work with ensuring it is free from calcite mineral deposits (circular white marks).
- Dry lay the paving prior to final installation/fixing to ensure the desired shade variation is achieved throughout the patio area.
- A slurry primer (such as Bradbond) should be applied to the underside of Slate paving prior to laying to improve adhesion.
- Do not use acidic based products during or after installation.
- Natural Slate is not suitable for steps and copings.

Natural Granite

A slurry primer (such as Bradbond) should be applied to the underside of Granite paving prior to laying to improve adhesion.

Do not use a resin based jointing compound with Granite.

Limestone

Indian Blue/Black Limestone is UV sensitive and over time will lighten in colour. We do recommend sealing limestone prior to laying, or as soon after laying when practically possible. Combined colour enhancers and sealers are available that will help keep the look for longer. Never use acidic based products during or after installation.

Porcelain paving

Manufactured from the finest raw materials, under strict controls allows us to obtain the exceptional technical characteristics which sets porcelain paving apart.

Anti-slip surface resistance

- Madera Grande and Madera Antigua = R12
- All other porcelain paving = R11

We recommend Progrout Flexible for pointing. Do not use white cement nor materials containing black pigments. Finishes are intentionally manufactured with slightly uneven colour tones and surface decoration, these subtle variations set these products apart.

The use of a slurry primer to the reverse of each paver is both essential and more importantly critical to the overall performance of Bradstone porcelain paving.

We recommend the use of Bradstone Bradbond for this. Apply as per instructions given on the tub. Applied to the underside using a stiff brush, it provides an exceptional bond between paver and the full wet bed underneath. Mixed to manufacturer's instructions and applied with care it forms an immediate bond which prevents the pavers from lifting or potentially moving in the future when correctly laid.

Bradstone porcelain paving can be cut on site and mostly to any size. We recommend the use of a portable saw (table saw, petrol driven disc cutter, rechargeable angle grinder) fitted with a good quality diamond porcelain blade. The blade should be water fed for dust suppression and to keep the blade cool. Scoring the product first and sawing from the face downwards will help to alleviate the potential risk of edge/surface chipping. There is a porcelain laying guide on bradstone.com.

Bradstone porcelain paving can be cleaned by applying a suitable cleaner. We strongly recommend the finished laid area be thoroughly cleaned/washed down which helps remove general building dirt, grout residue and any grease deposits that may be present. It is also recommended that periodic cleaning with a porcelain cleaner will help to keep the paving looking its best.

Dependent on the type of stain/surface residue present (i.e. suction marks, grease, grout, general building site dirt,) there is a wide range of off the shelf specialist cleaners available. Always check the manufacturer's instructions first before applying to any test area.

Concrete colour and maintenance

Colours may vary subtly, especially in blended shades. Colours will appear different during varying weather conditions such as sunlight and rain. Please check colour samples in dry conditions and in full daylight. Where possible, products should be selected from the same product batch. Our Peak paving should not be used for patios or areas where aesthetics are important.

Differential Weathering

Differential weathering can cause patchy dark discolourations on the surface of individual units. Again this will generally diminish over time and will not affect long term performance. This is due to differential weathering where the surface of the paving has cured at different rates. All decorative products will weather and change appearance over time.

Efflorescence

Efflorescence can appear on all paving products as white patches or a lightening of the surface colour, but seems to disappear when wet. It is formed by a normal chemical reaction which causes calcium hydroxide (lime) to migrate through the damp paving surface and then react with

carbon dioxide in the atmosphere resulting in a deposit of calcium carbonate crystals. Efflorescence is very unpredictable in its occurrence and can happen at any time of the year but is more prevalent in winter.

Although there are cleaners available, efflorescence is a natural phenomenon and will generally disappear with the natural weathering process and the passage of time. It does not compromise the integrity of the paving. Aggregate Industries cannot accept responsibility for the effect of efflorescence which can be a characteristic of all good quality products with a high cement content. For more information visit bradstone.com

Bradstone information

Bradstone reserves the right to alter specifications without prior notice. All products and services shown in this brochure are supplied subject to Aggregate Industries UK Ltd terms and conditions of sale.

No charge is levied for this brochure or the advice therein, and accordingly the company, its employees and authorised agents can accept no liability whatsoever, either directly or indirectly arising from the use of its products in connection with any information or advice contained in this guide.

Bradstone is part of Aggregate Industries UK Ltd. Aggregate Industries is the first company in the world to achieve a BES 6001:2008 Responsible Sourcing Certificate from BRE Global. Products are assessed on:

- Quality management
- Environmental management
- Health and safety management
- Greenhouse gas emissions
- Minimising raw material usage
- Labour practice
- Biodiversity
- Community engagement.

All Bradstone's manufacturing facilities are covered by BS EN ISO 9001 certification for product quality and service. Bradstone block paving products are also manufactured to, and in accordance with, BS EN 1338.

Each of the Bradstone manufacturing locations is certified to ISO 14001 for environmental management systems and 18001 for occupational health and safety. All dimensions quoted in this brochure are nominal and are for guidance only. Actual sizes may vary. Our products also conform to European harmonised standards for CE marking.
