

THE OLD RECTORY

Cloud Monitoring Solution for
Plant Room diagnostics

Plant Room Controller

Managed Network Switch

Ethernet

JANUS
TECHNOLOGY

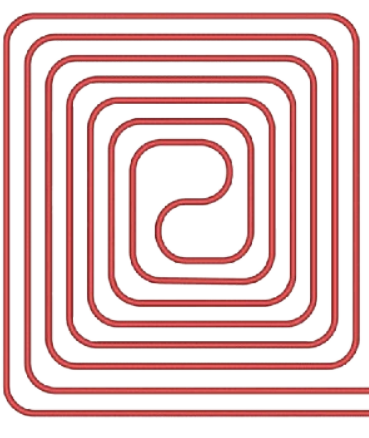

RS485 Modbus - Ethernet Gateway

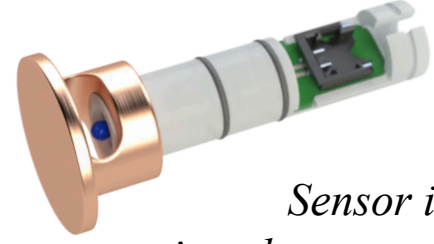

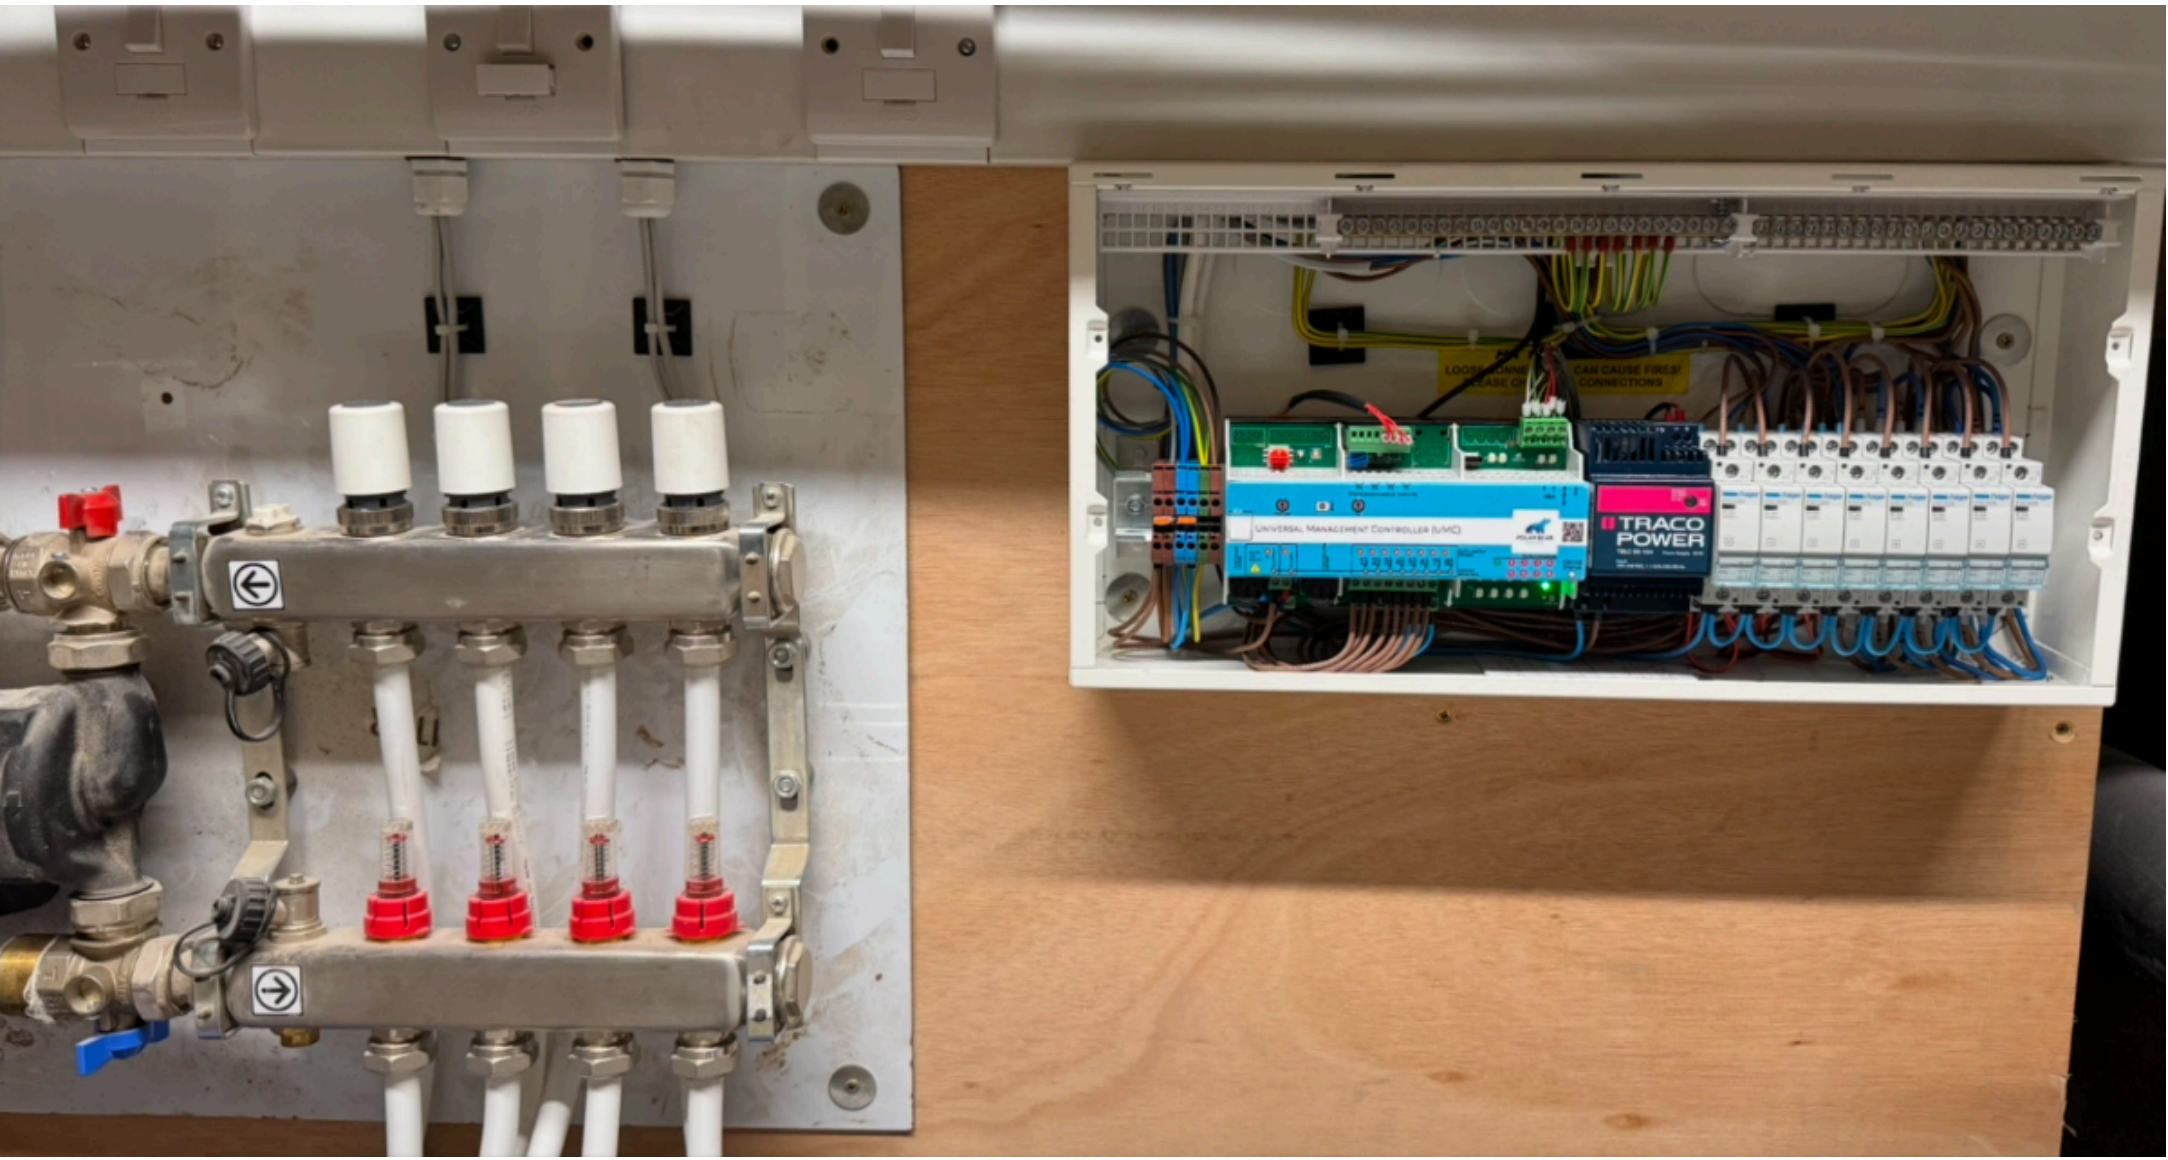

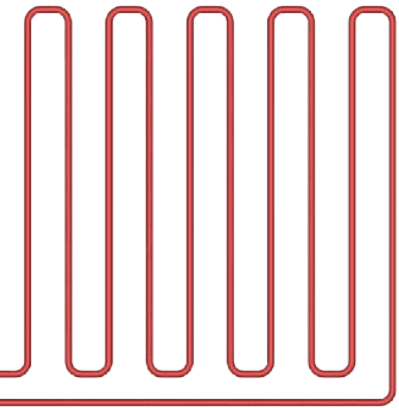

pBus Network

Zn2 UFH and Towel Heater
control with thimble air sensor
and floor protection

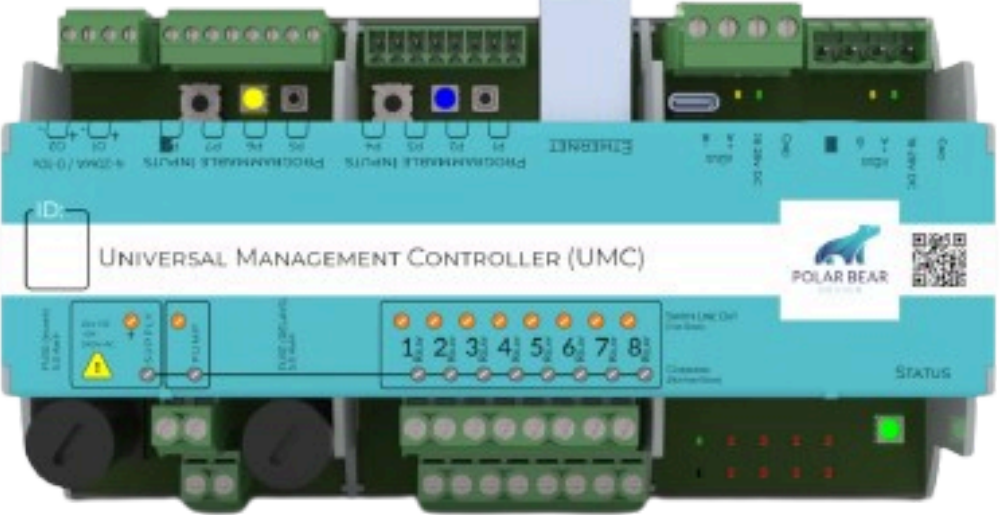

Zn1 UFH with temperature
protection limits

Sensor inputs to UMC Controllers to support
virtual temperature and groupings in Crestron Home system

Manifold temperature sensors

pBus Network

UMC Outputs

Integration to Crestron Home system with Janus Technology driver for two-way control
and enhanced support for additional modules, scheduling, fault monitoring and customisable tiles.
