Lutron Palladiom Finishes

The Polar Bear Design finishes do not match the Lutron Palladiom finishes. Some keypads come with metal finished buttons, we recommend using the BL - Black plastic buttons. For UPW options, the keypad base unit must be HQWT-B-P4W-BL-E

Crestron Horizon Finishes

When using the Crestron Horizon keypad in either black or white these can be matched to our MK - Matt Black or MT - Matt White finishes

The colours and finishes are generally made up from the reference codes below. Below shows the Polar Bear colour reference code. To be used can be used for reference only

Texture Finish	Colour	Raw Material
B - Bright / Polished	K - Black	b - Brass
S - Satin	B - Brass	s - Stainless Steel
Q - Antique	Z - Bronze	a - Aluminium
W - Wax	C - Chrome	f - Carbon Fibre
A - Anodized	H - Chrome Black	w - Wood
M - Matt Paint	P - Copper	z - Bronze
T - Satin Paint	N - Nickel	p - Copper
Y - None	I - Nickel Black	e - Leather
E - Bead Blasted	R - Rose Gold	
	T - White	
	Y - None	
	14k - 14 karot Gold	
	G - Graphite	
	L - Lacquer	
	xxxx - RAL Code	

Important Note:

All finishes are produced using a handcrafted process which introduces unique variations in both hue and graining.

These finishes are not produced by Lutron or Crestron and may differ.

There will be natural variation from unit to unit and batch to batch.

All bespoke finishes, Polar Bear Design will need to be supplied with a sample to match. The matching process will add significant delays.

Please refer to the price list for purchasing terms.
